

## We are LOCAL

Practical Computers, LLC is a family owned business out of Farmington, CT. References are available.

“ Boris has been my go-to computer expert for many years now and he's saved my computer and my sanity multiple times! There is nothing like having your term paper suddenly disappear or feeling overwhelmed with the continuous system updates prompts that seem to never load properly! Boris has come to my rescue many times, providing solutions for my both my old Dell and MacBook Pro. His service is quality, and professional! He even makes house calls! I'll never wait in line at the Geek Squad desk again!

Jasemin A.

## The Value of Preventative Maintenance

Continued success is hinged on consistent performance. Like any complex mechanism, computers need maintenance. End point computers as well as servers need to be cleaned, updated, scanned for viruses, protected from power surges, backed up and checked for performance. As the old adage states: “An ounce of prevention is worth a pound of medicine.”.

Schedule an in depth office computer audit to gain a significant insight into the status of your IT equipment.

## Computer Solutions IT Services

Bring order and balance to the computers In your life.
